AUSTRALIAN MINING
THE UPPER STOPES OF A GOLD-MINE
Wilkie

LL 7858

TUCK'S POST CARD

CARTE POSTALE. POSTKARTE.

By Appointment.

The Upper Stopes of a Gold Mine. The shaft is sunk near the reef or lode and tunnels or "drives" are made to the ore body which is worked "on a face". As the "face" is where work is proceeding, the space from which the ore has been removed is the "stope". The man with the rock drill is working in the "face" of the "stope".
